## Frontend Web Developer

As an enthusiastic and dedicated Developer, I possess a strong drive for continuous learning and growth. I am actively seeking a position that will allow me to further expand upon my existing skill set. My expertise lies in HTML, CSS, SCSS, Tailwind CSS, JavaScript, ReactJS, Git, and its version control. I am also capable of deploying my work via industry-standard tools like Vercels. Additionally, I have hands-on experience with popular web builders such as WordPress (Elementor) and Squarespace. I have successfully utilized a number of APIs in my work, including most recently OpenAI's GPT-3.

### WORK EXPERIENCE

#### Zuri Team

**Fullstack Development Trainee** Apr 2022 - Aug 2022

- Mastered the use of HTML, CSS and Javascript.
- Introduced to Python Programming.
- Create responsive web pages.
- As team leader, build a Fullstack media streaming website best suited for tertiary students.

**Emmanuel Inua** Remote Full-time

**Freelance** Aug 2022 - Present

- Developed a Next.js weather application utilizing Tailwind CSS and the OpenWeatherMap API.
- Created a series of React.js landing pages with Tailwind CSS, featuring high-profile clients such as Netflix, Tesla, and Data Analytics.
- Implemented various essential React dependencies, including axios, react-router-dom, react-typed, react-icons, and react-beautiful-dnd, to enhance functionality and user experience.
- Designed and developed a portfolio page using React Bricks, showcasing professional achievements and projects.
- Constructed a custom ChatGPT clone by leveraging OpenAI's API, along with express.js and Next.js, providing a personalized conversational experience.
